

Health Education England

COMMUNITY NURSING BIG CONVERSATION EVENT

01st March 2018

Please come along to an exciting event we are holding on March the 1st in Birmingham led by HEE and facilitated by NHS Elect.

As you know managing pathways across the NHS depends on a strong competent community nursing workforce, so we would like to get District and Community Nurses, Community Nurse leaders/Chief Nurses, Primary Care Nurses, colleagues who support clinical learning and providers of education together to better understand the size and shape of the community nursing workforce and the skills and knowledge needed to support future care needs. This is part of a national work stream led by HEE in conjunction with other key stakeholders and the outputs of the conversation on the 1st of March will contribute to this.

We have 50 places and will allocate on first come first served basis and you will be made most welcome on the day.
