IMPORTANT SUTURE DRUG TARIFF INFORMATION

In 2012, ETHICON reviewed the Drug Tariff suture codes with members of the ASPC and made the necessary amendments to ensure that the offering meets the needs of GP surgeries across the UK. In 2018, project VANTAGE, to achieve Suture Portfolio Harmonisation, has caused several of these sutures on the GP Drug Tariff to undergo a change in code. Therefore, some of the sutures will no longer be identified, bought, prescribed or reimbursable under the personal administration payments under their old code.

There will be a transition period as old stock held by suppliers is depleted.

The following is a table of the complete range. Codes in **blue** are the replacement codes in 2018.
